

Simphony All-in-One via Castles

Elevate the customer experience with mobile payments

In today's fast paced environments, consumers expect speed, efficiency and elevated customer experiences. Merchants need mobile payment solutions that deliver fast, frictionless experiences with seamless integrations. FreedomPay integrates Oracle Simphony for Android on Castle S1F4 technology for a hand-held POS solution with unprecedented ease, mobility and agility.

Global Connectivity with Android Sophistication

Merchants can now utilize FreedomPay's global connectivity on sophisticated Android payment devices. The same Next Level Commerce™ platform merchants implement globally will now be available within this Android-based line of devices, unlocking a world of new use cases and merchant flexibility.

Mobile Order & Pay Solution

Access FreedomPay's world class connectivity on an integrated All-in-One Point of Sale solution with ease on Castles Technology.

- **Faster checkout, anywhere:** Reduce wait times by bringing payments directly to the customer –tableside curbside, or in-store
- **Eliminate long lines:** Speed up service with mobile, on the go transactions
- **Seamless integrations for hassle-free operations:** FreedomPay eliminates the hassle of self-managing and maintaining integrations
- **Enterprise-grade technology** for next level efficiency

Rapid Installation

Rapid deployment of any number of devices is made possible via FreedomPay's CX Application. Easily organize device configuration from the Device Management Portal. Technicians remotely activate devices via QR code scan. Professional services available upon request to support installation.
